

Lace front Wigs FAQ'S

QWhat is a lace front wig?

Lace front wig are hair extensions that the hair is growing out of your scalp therefore making it look so natural with a lace material used at the base where each unit of hair are hand tied meticulously onto the lace.

QWhat is the lace front wig used for?

In the past lace front wigs were used mainly by actors and people who suffered from hair loss due to medical problems. But recently, most women use it for fashion since it gives them a long natural hair and make them look more beautiful. Celebrities like Beyonce and Tyra Banks are making lace wigs more widely popular.

QWhat is the difference between full lace wigs and other wigs?

Full lace wig allows you to wear your hair in up dos, ponytails, and that expose a person nape area while normal wig does not allow for this option. Also lace wigs are lighter and more comfortable than traditional wig.

QCan anyone apply and maintain lace front wig alone?

You do not need to be very skilful to apply and maintain your lace front but you may require very little learning on how to take proper care of your lace front and will provide you with all the tools you would require.

QWhat if I have a full hair can I use lace front wig?

Yes. You can braid or flatten your hair before application since your ultimate goal is get your hair as flat as possible for the best look.

QWhat is lifespan of my wig?

It depends of how you use and care for them. It will last between 3 months to 1 year if properly handled.

QCan I exercise, swim or play with lace front wigs?

A YES, the wig is just like your regular hair so you can do all normal activities with it

on such as exercising, swimming, showering, sweating, etc. No one will ever know that it is not your own natural hair. The only time you do not get it wet is the first 24 hours after applying the adhesive.
